

Appln. No. 10/628,622
Amendment dated May 25, 2006
Reply to Office Action of April 25, 2006
Docket No. 6266-19-1

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the instant application:

Listing of Claims:

1. (Currently Amended) A method for supplying hierarchical supplementary information related to printed books in a portal comprising the steps of:

establishing a portal of supplementary information related to printed books, said supplementary information stored in hypermedia documents retrievable through said portal;

distributing to a user base a plurality of different printed books[[:]] arrayed at a common location accessible to each user of the user base, each printed book being a non-electronic paper-based book and having inserted therein at least one bookmark;

associating each different printed book with a common uniform address, each said common address referencing a corresponding first hypermedia document in said portal and included on the at least one bookmark inserted in the printed book associated with the common address, said first hypermedia document comprising links to secondary hypermedia documents, said links corresponding to different ones of user classes;

providing a kiosk at said common location for interacting with said portal;

receiving from a user in said user base through said kiosk (a) a user-specified common address obtained from the at least one bookmark corresponding to one of said printed books and (b) a user identifier identifying said user as belonging to at least one of the different user classes, wherein, if the user identifier has not previously been supplied to the user, the user identifier is obtained from an attendant at said common location based upon information presented to said attendant by said user;

Appln. No. 10/628,622
Amendment dated May 25, 2006
Reply to Office Action of April 25, 2006
Docket No. 6266-19-1

responsive to receiving said user-specified common address, displaying through said kiosk in said portal a first hypermedia document corresponding to said user-specified common address;

~~identifying in said first hypermedia document corresponding to said user-specified common address a user class associated with said user;~~

searching a stored list of user identifiers cross referencing a plurality of user classes to determine which of the different user classes said user belongs to; and,

responsive to identifying said associated user class, displaying through said kiosk one of said secondary hypermedia documents, said secondary hypermedia documents having supplementary information pertaining to said books associated with said user-specified common address, said supplementary information being consonant with said associated user class.

2. (Currently Amended) The method according to claim 1, ~~wherein said associating step comprises the step of including with at least one printed book among said printed books a bookmark having a reference to common uniform address; wherein said common uniform address is an address of a first hypermedia document common to all said printed books.~~

3. (Original) The method according to claim 1, wherein said providing step comprises the step of:

positioning a kiosk in a retail store;

said kiosk comprising a computer system executing a hypermedia document browser for displaying said portal, a display for displaying hypermedia documents loaded in said browser, and control input means for accepting input from a user of said portal.

Reply to Office Action of April 25, 2006
Docket No. 6266-19-1

4. (Original) The method according to claim 3, further comprising the step of:

providing fixed storage with said kiosk;
said fixed storage storing said portal.

5. (Original) The method according to claim 3, further comprising the step of:

connecting said kiosk to a computer communications network; and,
enabling said browser to retrieve hypermedia documents from said computer communications network.

6. (Original) The method according to claim 4, further comprising the step of:

connecting said kiosk to a computer communications network; and,
enabling said browser to retrieve hypermedia documents from said computer communications network.

7. (Original) The method according to claim 3, further comprising the step of:

connecting said kiosk to a POS system in said retail store;
enabling said browser to communicate with said POS system through said connection; and,
performing purchase transactions of printed books through a hypermedia document displayed in said browser, said purchase transaction consummated by said POS system.

Docket No. 6266-19-1

8. (Original) The method according to claim 1, wherein said identifying step comprises identifying a user in said user base with a particular user class said user class selected from the group consisting of adults and children.

9. (Original) The method according to claim 8, wherein said step of displaying secondary hypermedia documents comprises the steps of:

responsive to identifying said associated user class, where said identified associated user class corresponds to a child user identity, displaying through said kiosk one of said secondary hypermedia documents having child-oriented supplementary information particular to said printed books; and,

responsive to identifying said associated user class, where said identified associated user class corresponds to an adult user identity, displaying through said kiosk one of said secondary hypermedia documents having adult-oriented supplementary information particular to said printed books.

10. (Original) The method according to claim 8, wherein said step of displaying secondary hypermedia documents comprises the steps of:

responsive to identifying said associated user class, where said identified associated user class corresponds to a child user identity, displaying through said kiosk one of said secondary hypermedia documents having child-oriented supplementary information particular to said printed books; and,

responsive to identifying said associated user class, where said identified associated user class corresponds to an adult user identity, verifying said adult user identity of said user; and,

responsive to said verification of said adult user identity, displaying through said kiosk one of said secondary hypermedia documents having adult-oriented supplementary information particular to said printed books.

Appln. No. 10/628,622
Amendment dated May 25, 2006
Reply to Office Action of April 25, 2006
Docket No. 6266-19-1

11. (Original) The method according to claim 1, further comprising the step of:

including with each said secondary hypermedia document, a plurality of hyperlinks referring to additional hypermedia documents;

said additional hypermedia documents provided by at least one of the following: museums, art galleries, colleges, universities, foundations and government administrations and agencies.

12. (Original) The method according to claim 1, wherein said step of displaying secondary hypermedia documents comprises the steps of:

providing a secondary hypermedia document having a plurality of hyperlinks each hyperlink corresponding to one of said plurality of different printed books;

accepting a selection of one of said hyperlinks by said user, said selection corresponding to a particular printed book; and,

in a third hypermedia document, presenting each page of said particular printed book to said user.

13. (Original) The method according to claim 12, wherein said presenting step comprises the step of successively visually displaying each page of said particular printed book at a rate exceeding a speed under which a child user can read each word on each said page.

14. (Original) The method according to claim 12, further comprising the steps of:

Appln. No. 10/628,622
Amendment dated May 25, 2006
Reply to Office Action of April 25, 2006
Docket No. 6266-19-1

providing a fourth hypermedia document having a plurality of hyperlinks, each said hyperlink referring to a common activity having supplemental information pertaining to said particular printed book;

accepting a selection of one of said hyperlinks by said user; and,

in response to said selection, providing a fifth hypermedia document containing said common activity pertaining to said particular printed book.

15. (Original) The method according to claim 12, further comprising the steps of:

providing an electronic guide in said secondary hypermedia document for supplying audio prompts to said user; and,

outputting said audio prompt in coordination with said electronic guide, said audio prompt prompting said user to select one of said hyperlinks displayed in said secondary hypermedia document.

16. (Original) The method according to claim 1, wherein said establishing step comprises the steps of:

establishing a portal of supplementary information related to printed books, said supplementary information stored in hypermedia documents; and,

storing said hypermedia documents in a fixed storage;

said hypermedia documents being retrievable from said fixed storage by a hypermedia document browser responsive to user requests for said hypermedia documents.

17. (Original) The method according to claim 16, wherein said storing step comprises the step of:

Appln. No. 10/628,622
Amendment dated May 25, 2006
Reply to Office Action of April 25, 2006
Docket No. 6266-19-1

storing said hypermedia documents in a fixed storage in a hypermedia document server connected to a computer communications network;

said hypermedia documents being retrievable through said computer communications network responsive to requests by hypermedia document browsers communicatively connected to said hypermedia document server.

18. (Original) The method according to claim 16, wherein said storing step comprises the step of:

storing said hypermedia documents in a fixed storage in said kiosk;

said hypermedia documents being retrievable from said fixed storage responsive to requests by a hypermedia document browser executing in said kiosk.

19. (Original) The method according to claim 18, wherein said fixed storage is selected from the group consisting of a CD-ROM, a DVD, an optical disk, a digital audio tape, a floppy disk, a hard disk and a removable disk.

20. (New) A method for supplying hierarchical supplementary information related to printed books in a portal comprising the steps of:

establishing a portal of supplementary information related to printed books, said supplementary information stored in hypermedia documents retrievable through said portal;

distributing to a user base a plurality of different printed books arrayed at a common location accessible to each user of the user base, each printed book being a non-electronic paper-based book and having inserted therein at least one bookmark;

associating each different printed book with a common uniform address, each said common address referencing a corresponding first hypermedia document in said portal and included on the at least one bookmark inserted in the printed book associated with

Docket No. 6266-19-1

the common address, said first hypermedia document comprising links to secondary hypermedia documents, said links corresponding to different ones of user classes;

providing a kiosk at said common location for interacting with said portal;

receiving from a user in said user base through said kiosk (a) a user-specified common address obtained from the at least one bookmark corresponding to one of said printed books and (b) a user identifier identifying said user as belonging to at least one of the different user classes, wherein said user has been previously supplied the user identifier or receives the user identifier from an attendant in the proximity of the kiosk based upon information presented to said attendant by said user;

responsive to receiving said user-specified common address, displaying through said kiosk in said portal a first hypermedia document corresponding to said user-specified common address;

searching a stored list of user identifiers cross referencing a plurality of user classes to determine which of the different user classes said user;

searching a stored list of and,

responsive to identifying said associated user class, displaying through said kiosk one of said secondary hypermedia documents, said secondary hypermedia documents having supplementary information pertaining to said books associated with said user-specified common address, said supplementary information being consonant with said associated user class;

wherein said secondary hypermedia documents are displayed through said kiosk as a sequence of images, and wherein a rate at which the sequence of images are displayed is based upon the user class to which said user belongs.
